The coffee machines you can trust.

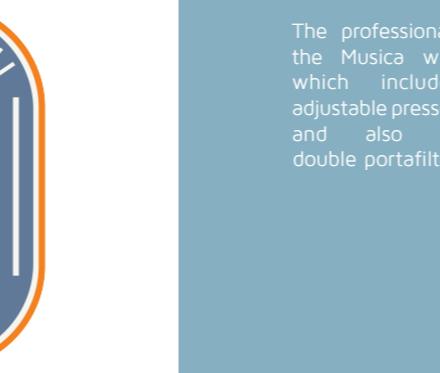

# MUSICA

Dedicated to those who want to enjoy an espresso that tastes like it comes from a bar at home, in the office, in small communities and in b&bs. Discover the advantages

Musica is a professional coffee machine, extremely simple to use even for non-expert coffee lovers.

The incorporated technologies allow optimal coffee extraction and create a great cup of cappuccino.

Musica can brew coffee and steam milk simultaneously thanks to its professional components.

The brew group is thermally balanced and equipped with a pre-infusion system which allows the extraction of all the coffee's distinctive flavours. The water temperature remains constant thanks to its efficient heat exchanger.

The boiler is insulated, guaranteeing energy saving and high steam capacity to steam milk. Through the visible pressure gauge, the user can check the boiler's pressure.

The hot water wand, equipped with a programmable volumetric dosing system, allows the user to prepare many infusions in few seconds.

The portafilter is professional-grade and ergonomic, just like the practical steam slide lever.

Musica is available in two finishes: with all-black trim, or white & grey trim with LED lighting inside, which can be turned on or off independent of the machine being on or off.

The professional user can also customize the Musica with the professional pack, which includes a commercial-grade adjustable pressostat for superior precision, and also one single and one double portafilter.
