

Eureka Performance is built on the Eureka Essential platform, but with a sound-dampening design, and is available in a matte black or stainless steel finish with a chromed metal front.

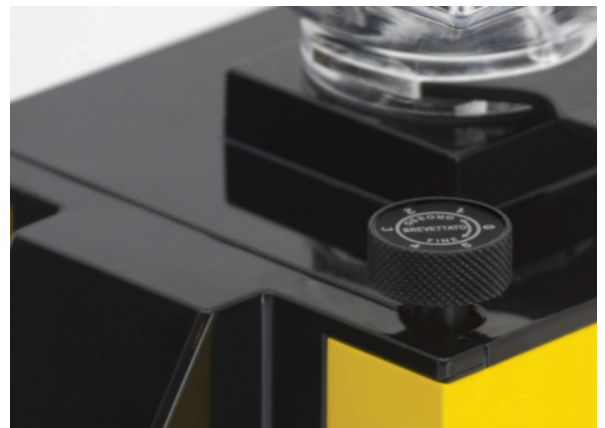

The doser-less design of the Performance allows you to grind coffee directly into your portafilter, minimizing the amount of coffee grounds left-over between shots. The Performance also delivers a light and fluffy cone for more accurate tamping.

Though compact (only 14" tall), the Performance features a powerful direct-drive motor, large 50mm burrs, an adjustable fork to properly fit any portafilter, and micro-metric grind adjustments to dial in the perfect grind setting.

Burrs: 50mm carbon steel | **Bean Hopper:** 300g

Finish: matte black or chrome + chromed metal front

Height: 35cm/14" | **Width:** 12cm/4.75" | **Depth:** 18cm/7" | **Weight:** 5.5kg/12.5lb
